

Project Report: Work Progress

- Project Title: Work Progress
- Project ID-Y1-2024-25-G169
- Team Members-
 - MAANYA CHAUHAN
 - VANSHIKA RANI
 - SOURAV
 - KAVYA SHARMA
- Course- B.TECH CSE (cybersecurity)

Introduction-

Work Progress is a web-based application designed to simplify task creation and management. Users can easily add, organize, and prioritize their to-do lists without any hassle. No sign-up required, ensuring instant access.

Objective of the Project-

To create a simple, user-friendly task management tool. Help users stay organized without the burden of account creation or software installation. Enhance productivity through minimalistic design and maximum accessibility.

Features-

- Create and manage tasks easily.
- Set due dates for tasks.
- No login or signup required.
- Access lists across any device (browser-based).
- Delete list feature for management flexibility.

Technology Used-

- Front-End: HTML, CSS, JavaScript
- Hosting/Platform: Code Pen
- Additional Tools: Free vector illustrations for UI improvement

Scope of the Project-

- Suitable for students, professionals, and anyone needing simple task management.
- Can be expanded with user authentication in the future.
- Ideal for personal productivity and small project management.
- Aims to bridge the gap between complex task apps and simple daily needs.

Challenges-

- Designing a minimalist yet effective user interface.
- Managing data persistence without backend storage.
- Keeping the user flow intuitive (especially for task addition and list deletion).
- Designing a minimalist yet effective user interface.

Impact –

- Increased ease of task management for users.
- Encouraged productivity through simplicity.
- Enabled task tracking anytime, anywhere without dependency on device or account.
- Lowered the barrier to use compared to complex productivity apps.

Conclusion-

Work Progress successfully simplifies task management for everyday users. It delivers speed, accessibility, and usability without complexity. Ready to evolve with new features based on user needs.

"Productivity isn't about doing more, it's about making more happen."
